

STACLEAN PROTEC COBALESS

Thin folded sheet type high-efficiency desiccant composed of STACLEAN (dust-free paper) and transparent film. “Cobalt” specified as the controlled substance in the EU directives is not contained.

◆ Application

- * Desiccant to be used in places where cleanliness is required for transportation and storage of semiconductors, liquid crystals, and electronic parts materials

◆ Features

- * An indicator not containing cobalt, which has been developed for the first time in Japan, is adopted.
- * STACLEAN is used to minimize the dust generation rate to a minimum. The permeability peculiar to paper ensures high hygroscopicity.
- * The antistatic film is appropriate for prevention of static charge.
- * One sheet is composed of four 5g bags. Perforations facilitate subdivision.

◆ Product configuration

◆ Change in indicator color at each relative humidity

- * The indicator is green when it is dry, but it changes to pink (orange) gradually when it absorbs moisture, permitting confirmation of the condition of moisture absorption.

◆ Standard and specification

Product name	Product No.	Standard	Lot	Price	Before-tax price
STACLEAN PROTEC COBALESS	PROCL5	5 g × 4 bags/sheet	250 sheets/case	21,000	20,000
